After a long night
watching spacejam,
paul allen is late to
work and needs to
Microsoft to build
world class
products asap

He asks his buddy bill, “Hey bill how do you get to work?”

“I take my brand new 2022 409-HP Twin Turbo V6, full-time 4WD Lexus LX”

Aw darn, Paul thinks, I dont have a car, how will I get to work efficiently?

I know! I will walk! But what's the quickest path to Microsoft hq? I don't know the streets as well as these youngins do

You look street smart and street wise, how do I find the quickest way to Microsoft

Rumor says, the new PlugWalk app will show you the quickest shortcut to get there AND estimate the time based off your walking speed

Text ya mom this!

- Thank you nino! Now I can PlugWalk my way down to make windows 12

After sitting around for the day, Jim Hambro decides it's time for his daily jog.

Being a former chemistry teacher, he's a smart guy, and looks on Google maps to figure out a route for his jog. However, is skeptical of using it, because last time he used it, the app didn't warn him about a blocking on 2 sidewalks that he was jogging on. He decides to find a new app to use.

Jim finds this app on the app store called “PlugWalk”, he looks at its description and decides to try it out. After opening the app, he notices how many features it has when deciding for a route to jog on. Features such as how fast he can jog, possible shortcuts, and most importantly hazards and possible blockings that could occur, even start and stop times estimated for speed.

After choosing his route, Jim gets ready for his jog.

While on his jog, Jim notices the paths that got blocked off and is amazed how the app correctly gave him alternate routes for his jog.

When he gets home from his jog, Jim is really happy that the app met his expectations, and will definitely be using it every day from now on.

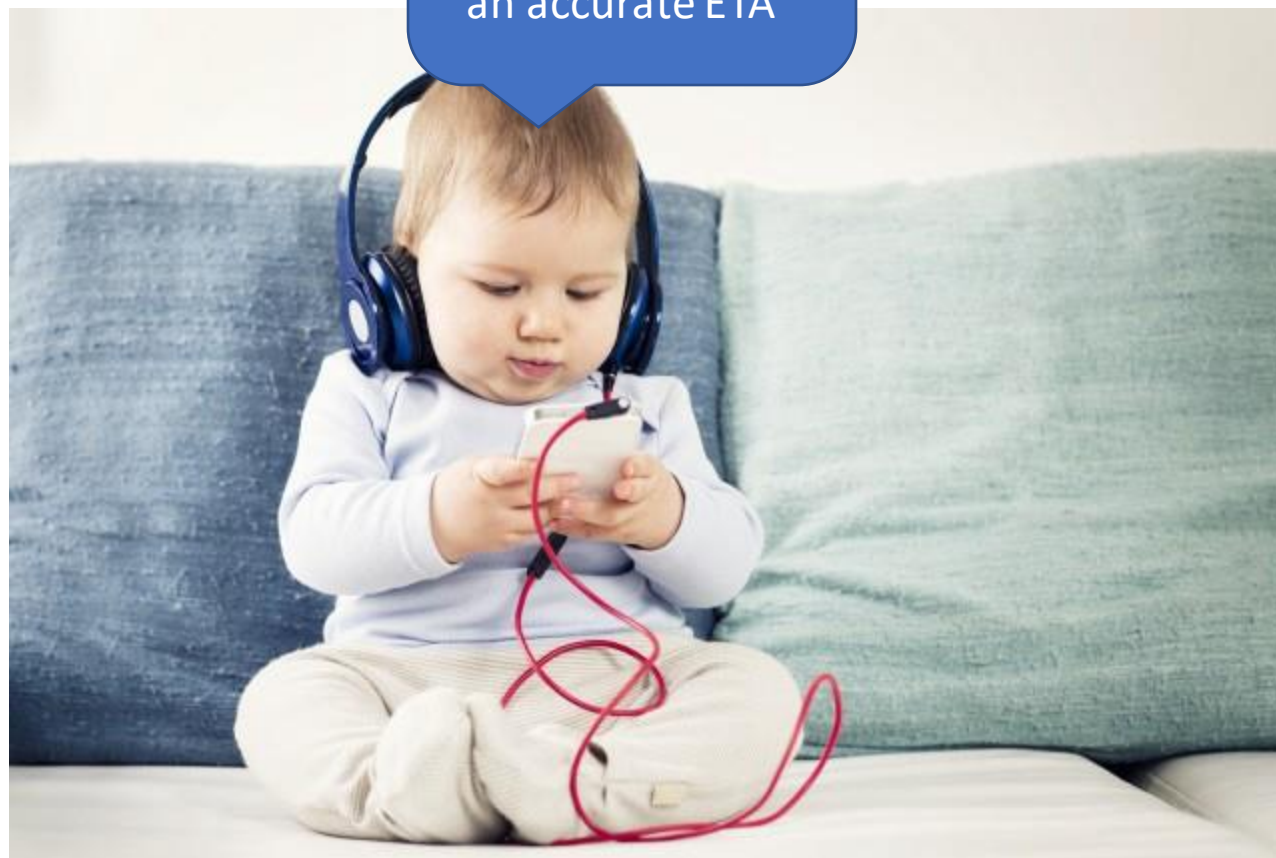

BRYLAND BRISTOPHER

Charles Henley Storyboard

"Ayo Bryland we need
you down here for
lunch, we're at 929 on
Gervais"

"Gotchu bro,
lemme check
PLUGWALK to get
an accurate ETA"

Aight so PLUGWALK says based on my avg jogging speed it should take me about 10 to run there. Give or take a few minutes for traffic lights.

"aight big hoss it'll be
about 10"

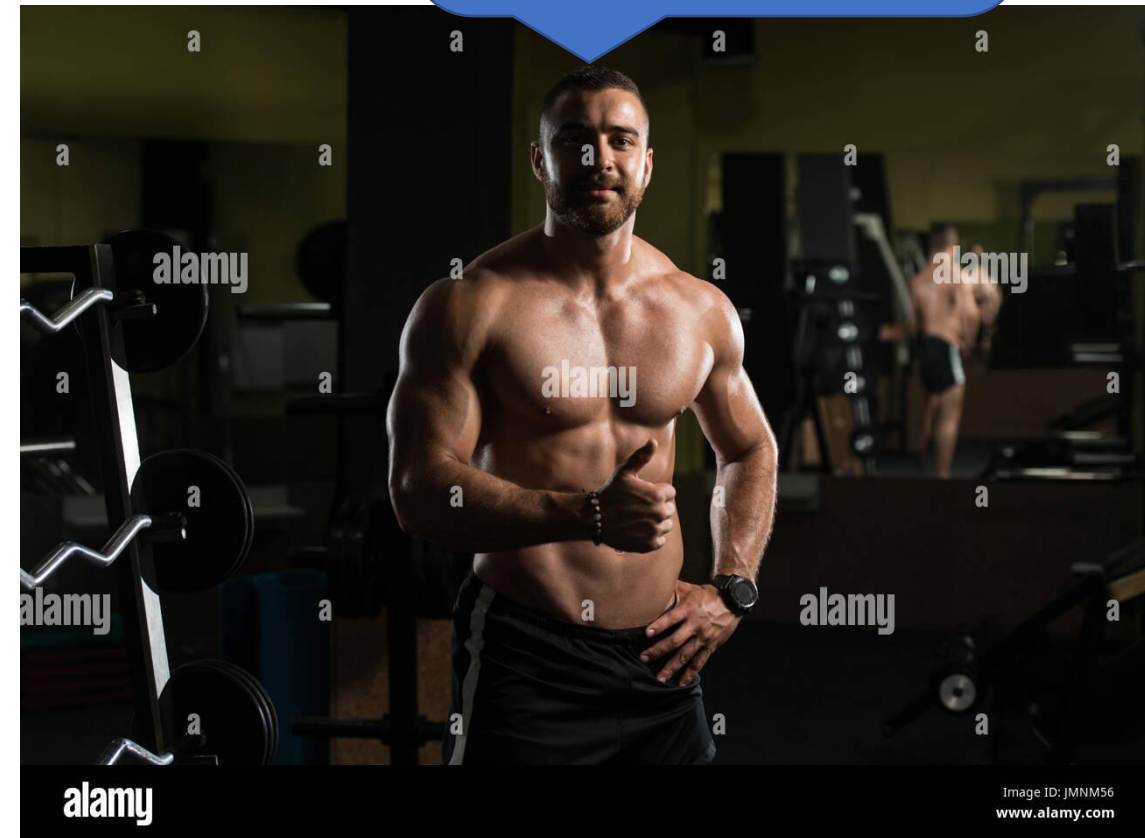

"10?? It's like 15 miles
bro apple maps tellin
me it'd take like two
hours to run that"

"nah man PLUGWALK
takes my speed into
account, you forget
I'm an olympian?"

"Oh okay, see you here bro,
wings are on me today, you
need all the fuel you can
get for Olympics 2024 LA"

I can't believe how accurate
PLUGWALK is, it's actively changing my
ETA based on current weather
conditions, and speed, this is mad cool
and totally much better than apple
maps and waze and google maps and
physical paper maps and GARMIN GPS
products and BAOFENG GPS products

"wow bro you made it over here
QUICK, that ETA you gave was super
accurate!"

"It's all thanks to
PLUGWALK bro, with my
time management being
this good (thanks to
PLUGWALK) the
Olympics are a shoe in"

*Bryland Bristopher
would go on to win gold
sprint in the next 15
olympics, reigning
champ for 60 years. He
attributes his success not
to hard work, but to
PLUGWALK. Bryland
would go on to die in a
police standoff after a
scandal regarding fixed
matches in his college
career.*

After a night of hardcore partying, Anna wakes up 10 minutes before her first class. Luckily she has plenty of coffee to wake her up.

As she's sprinting to class while trying not to spill her coffees, she is stopped by a massive brawl that makes her late to class

As Anna is telling her friend about the crazy brawl she saw that made her late to class, her friend tells her about an app called PlugWalk that would show her shortcuts that would avoid hazards like fights.

shutterstock.com · 1934001293

After she downloads the app, she realized that you can also put in how fast of a walker you are (Anna is probably the fastest walker on campus). She raves at this fact considering google maps would always make her early to classes which meant she sat around doing nothing for 5 minutes.

Using plugwalk, she can even find shortcuts through side street and suspicious alleyways that make her iced coffee runs even quicker!

Now that her life is min maxed to the most extreme degree with the help of PlugWalk, there is not a minute in the day wasted letting her sleep as peacefully as the 3 iced coffees she drank before bed will let her.
